## ABOUT US

---

Everything we do is about you. From the raw material that comes from Europe and North America to the technology and designs that exactly match your needs. We strive to produce for you the best, and we remain Loyal to you. Your comfortability and your time are what we work for.

# STORY

---

Our story began in 1986. Back then El-Lawendy for industry and trading were from the firsts UPVC pipes importer and distributor in Egypt when the shifting from using the old steel piping system started.

In 2006 we expanded our activates to import and produce high-quality different building materials, chemicals, and raw materials from many countries around the world.

Today, we are producing the best and finest UPVC profiles for the window and doors systems. Premier UPVC in the highest quality and the smartest designs in the Egyptian market. Our unique formula, the products' variety, and systems' compatibility are the outcome of generations' experience.

# MISSION

---

Create  
comfortability  
and Innovation  
in every building  
in the world.

## MISSION

---

- Innovation;

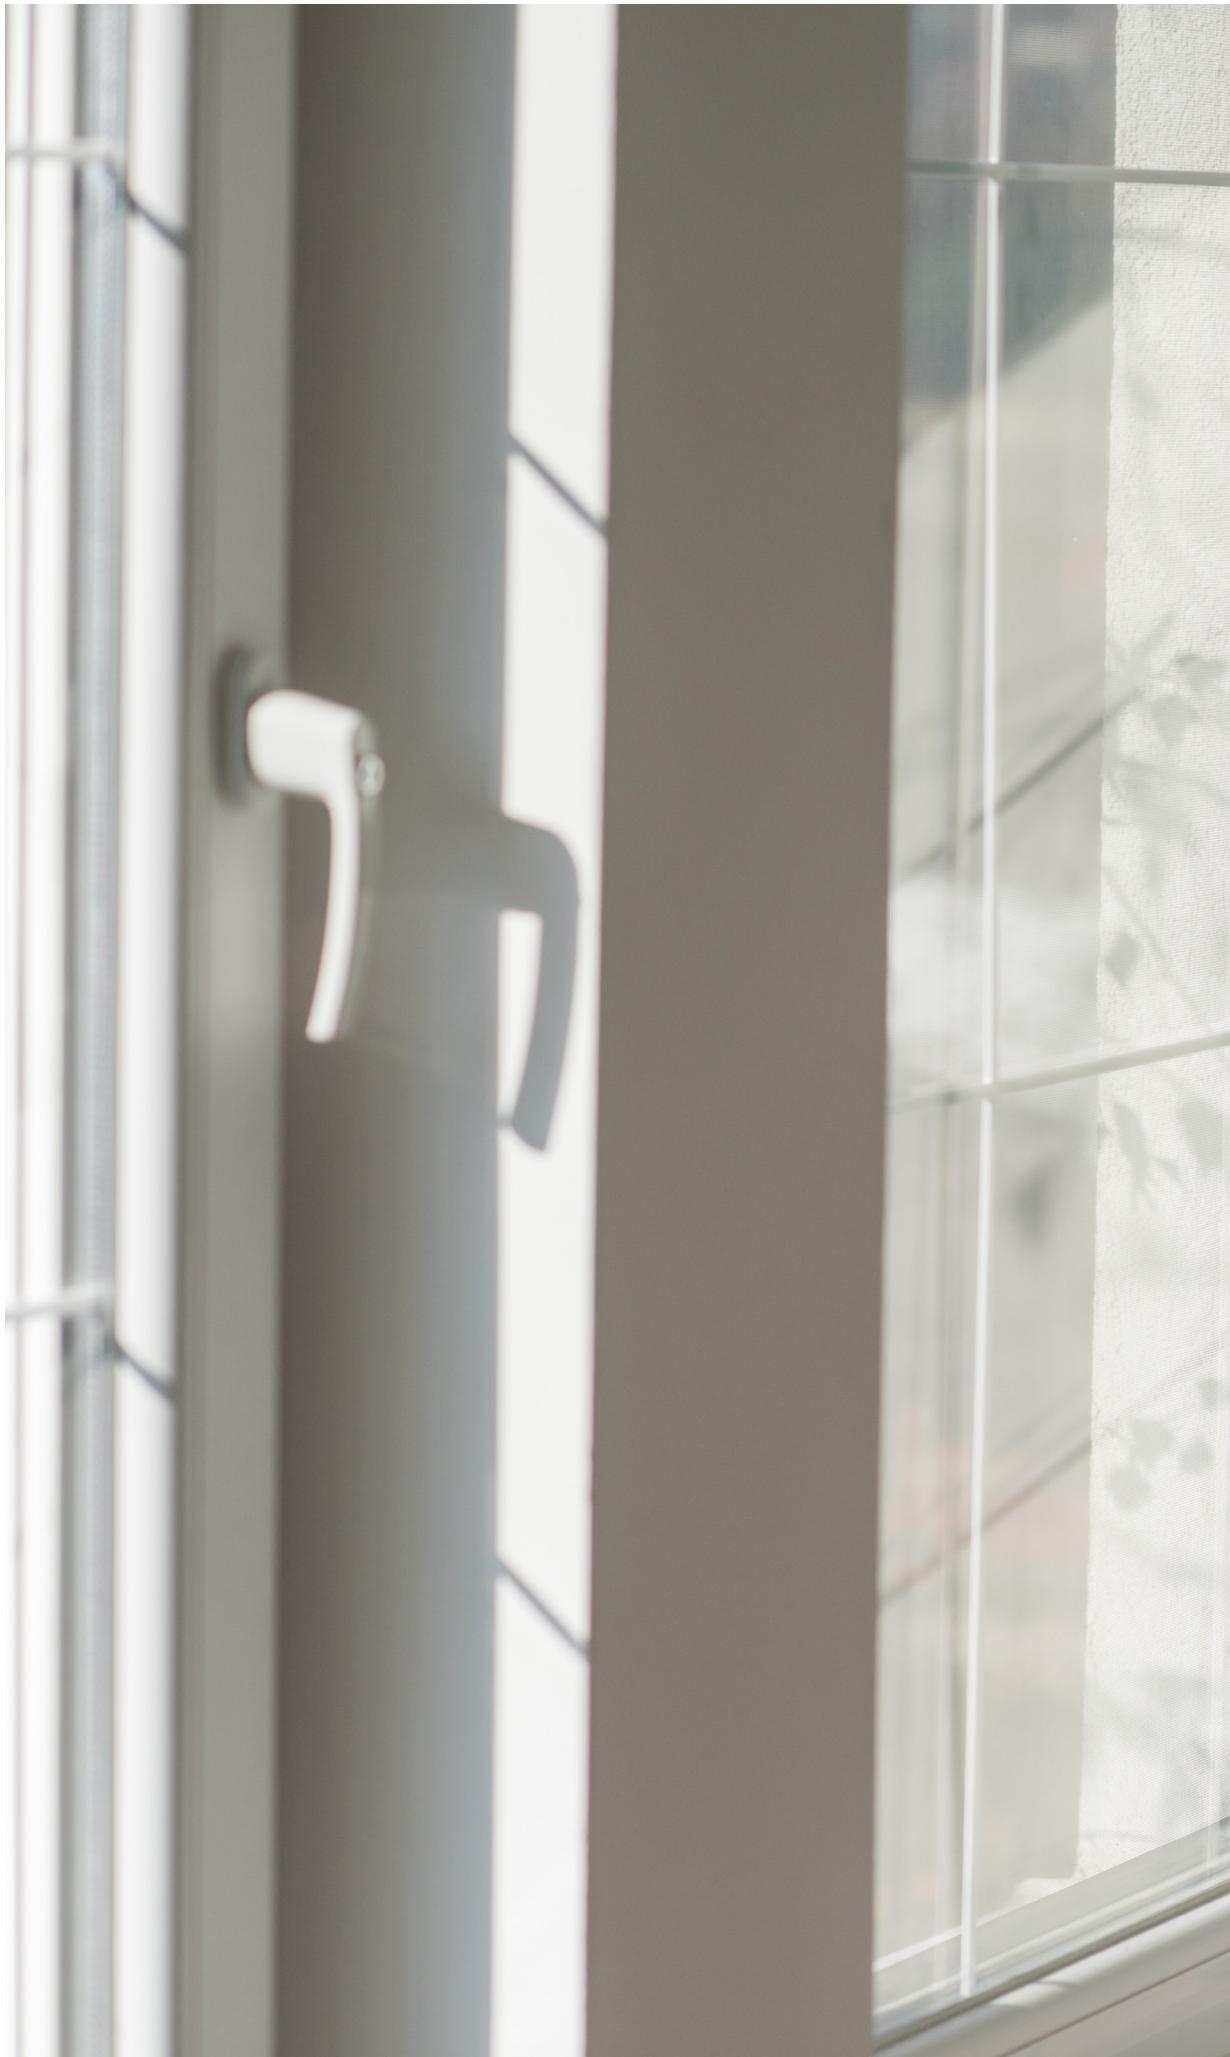

We dare to design the future of UPVC systems.

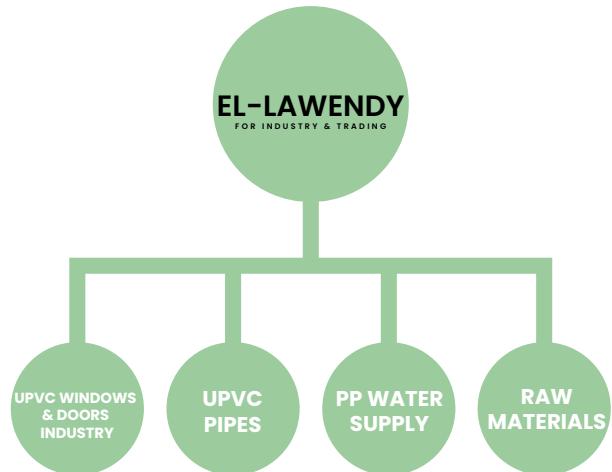

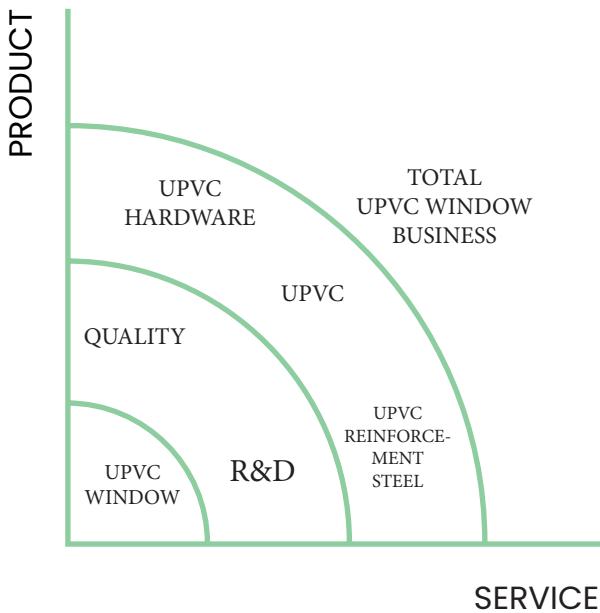

- Our team

A team that's Motivated, Ambitious, and Loyal to create a better future.

- Sustainability

We believe in our responsibility for the environment. We use organic and lead-free raw material for a healthy planet. We create eco-products that decrease energy consumptions in your buildings through 90% lower thermal conductivity.

## 1. Top Quality in Production

Over 30 year, we have accumulated experience in matching the market need and securing the supply.

## 3. Over 30 years Know-how

Optimized products developments and blending recipes according to each country's trend and climate

## 2. Specialized in buildings material

Professionalism in building materials company with innovative products and differentiated solution.

## 4. Advanced Performance

Received domestic and international certification

## 5. Total solution Provider

Premier UPVC

- In-house developments
- Quality control

## 6. Test Centers

Testing performance and quality throughout in-house testing machinery

## 7. Training center for best quality

In order to supply the best quality to customers, Premier UPVC operates Fabrication and installation center with consistent training.

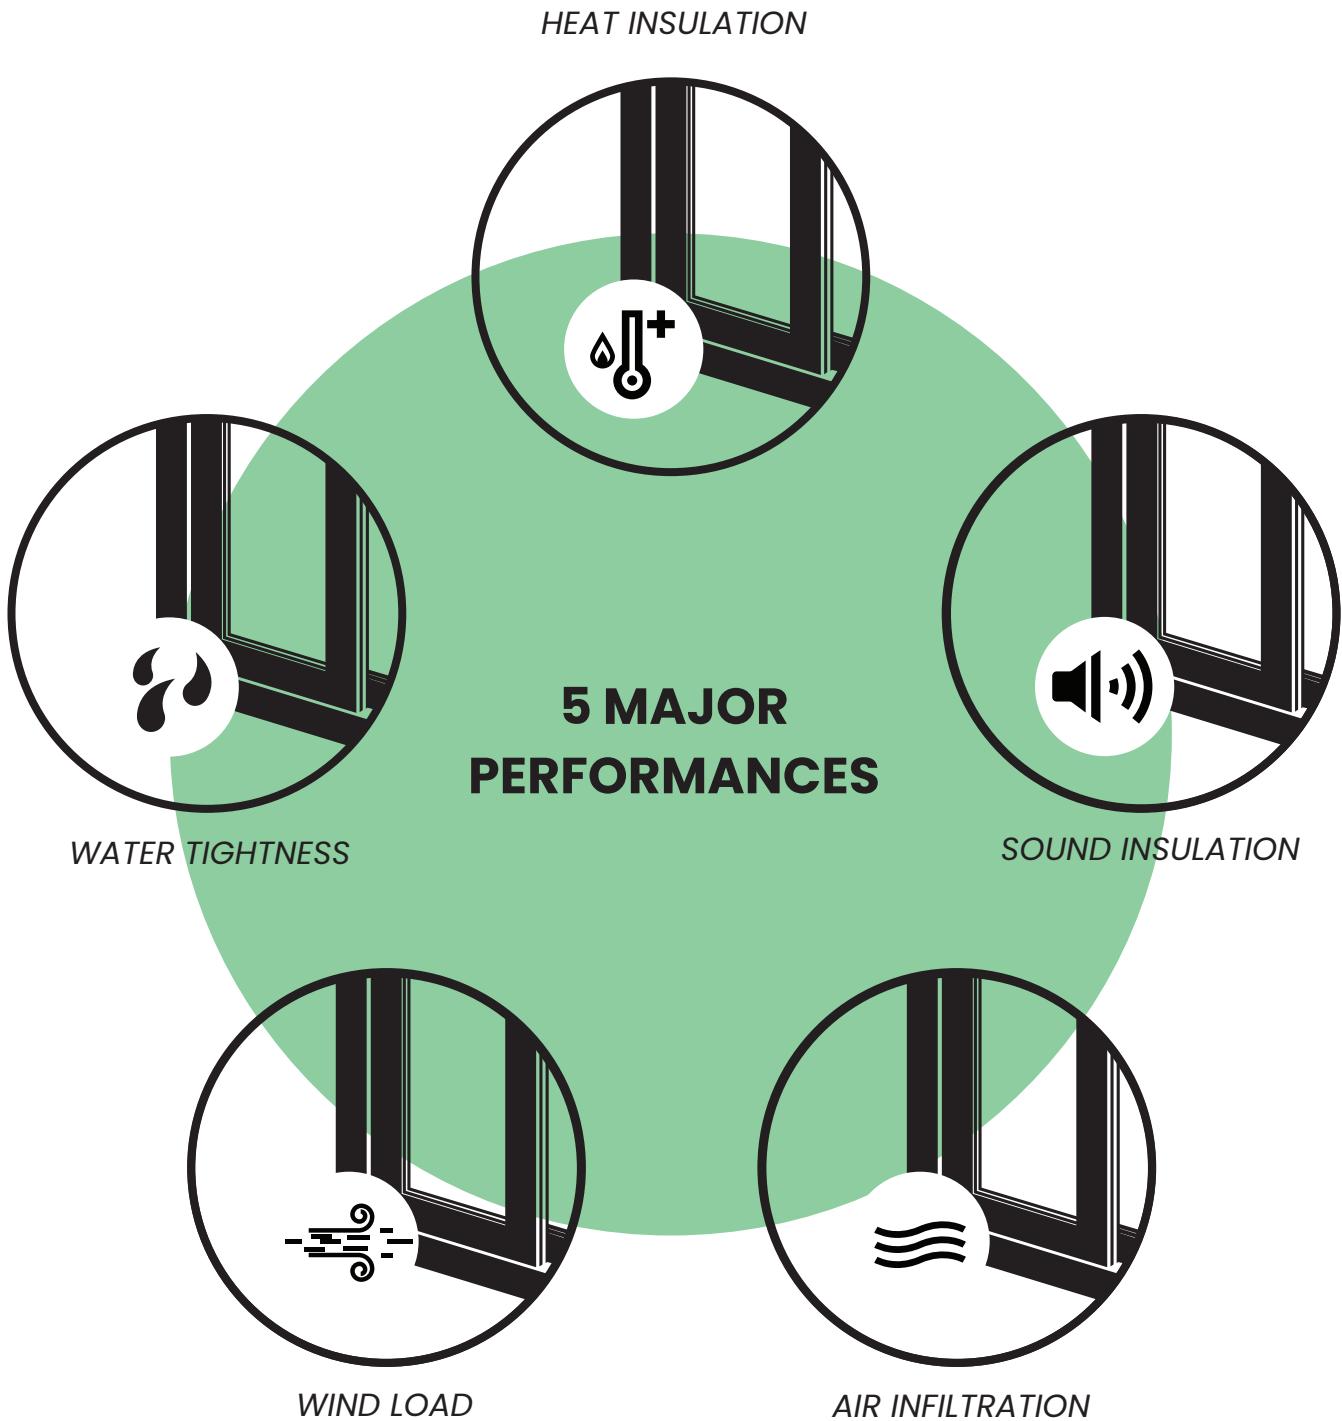

## 8. Design Center

“Design Center” for latest research and develop new systems to reach the market need training.

# PREMIER UPVC WINDOW & DOOR

## HEAT INSULATION

Premier's windows keeps efficiently cold air from outside by sealing structure and multi-chamber design. Also when use more thicker glass or insulation glass can enhance performance.

## SOUND INSULATION

Premier's window provide excellent sound insulation through use of special hardware and gasket between frames to provide more pleasant and comfortable interior space.

## AIR INFILTRATION

When the amount of air that passes through unit area per unit hour is measured, the amount for Premier's window is less compared with traditional window because of unique profile welding system.

## WIND LOAD

Most of the claims and defects in breakage window by a strong wind due to using low-quality window. Premier's window is much stronger by multi-chamber structure frame and strengthened profile by steel reinforcement.

## WATER TIGHTNESS

Even the small amount of water can cause huge damage to home interior. Premier's window doesn't leak water throughout joint parts due to unique fusion welding system and specially designed stair type structure.

# PREMIER UPVC SLIDING WINDOWS

---

PREMIER UPVC always considers the importance of good external appearances as well as making a healthy and comfortable living space. You can feel a more beautiful scene and fresh air through the PREMIER

# SLIDING WINDOW PRE-S 90

## General sliding style window

Glass		5 - 18 mm
Chambers		3 chambers
Thickness		2 mm

## Features

### Double sealed interlocking parts

- Maximize the isolation of dust and enhance the insulation performance

### Easy and high-quality installation performance

- Fully welded angles, Rail – integrated frame

### High water resistance

- Water flow system inside the profile for a natural flow of water to the outside

### Built-in mesh system

- More comfortable with additional mesh frame

### Advanced hardware systems

- Multi-lock points for more safety, up to 5 lock points

# SLIDING WINDOW PRE-S 120

Improve performance in every single way

Glass		5 – 30 mm
Chambers		3 chambers
Thickness		2.5 mm

## Features

Applicable in seashore buildings

- Strong structure against high-pressure wind

High water resistance

- Water flow system inside the profile for a natural flow of water to the outside

Available in two types of sash

- A sash of small spaces window and another sash for large spaces

Advanced hardware systems

- Multi-lock points for more safety, up to 5 lock points

Optional mesh system and overlap

- Available with and without mesh system and overlap

## SLIDING WINDOW PRE-S 140

Glass		5 - 30 mm
Chambers		3 chambers
Thickness		2.5 mm

### Features

#### Widen opening dimension

- Opening dimension is widened from 1/2 to 2/3 by 3 track rails

#### Applicable in seashore buildings

- Strong structure against high-pressure wind

#### High water resistance

- Water flow system inside the profile for a natural flow of water to the outside

#### Built-in mesh system

- More comfortable with additional mesh frame

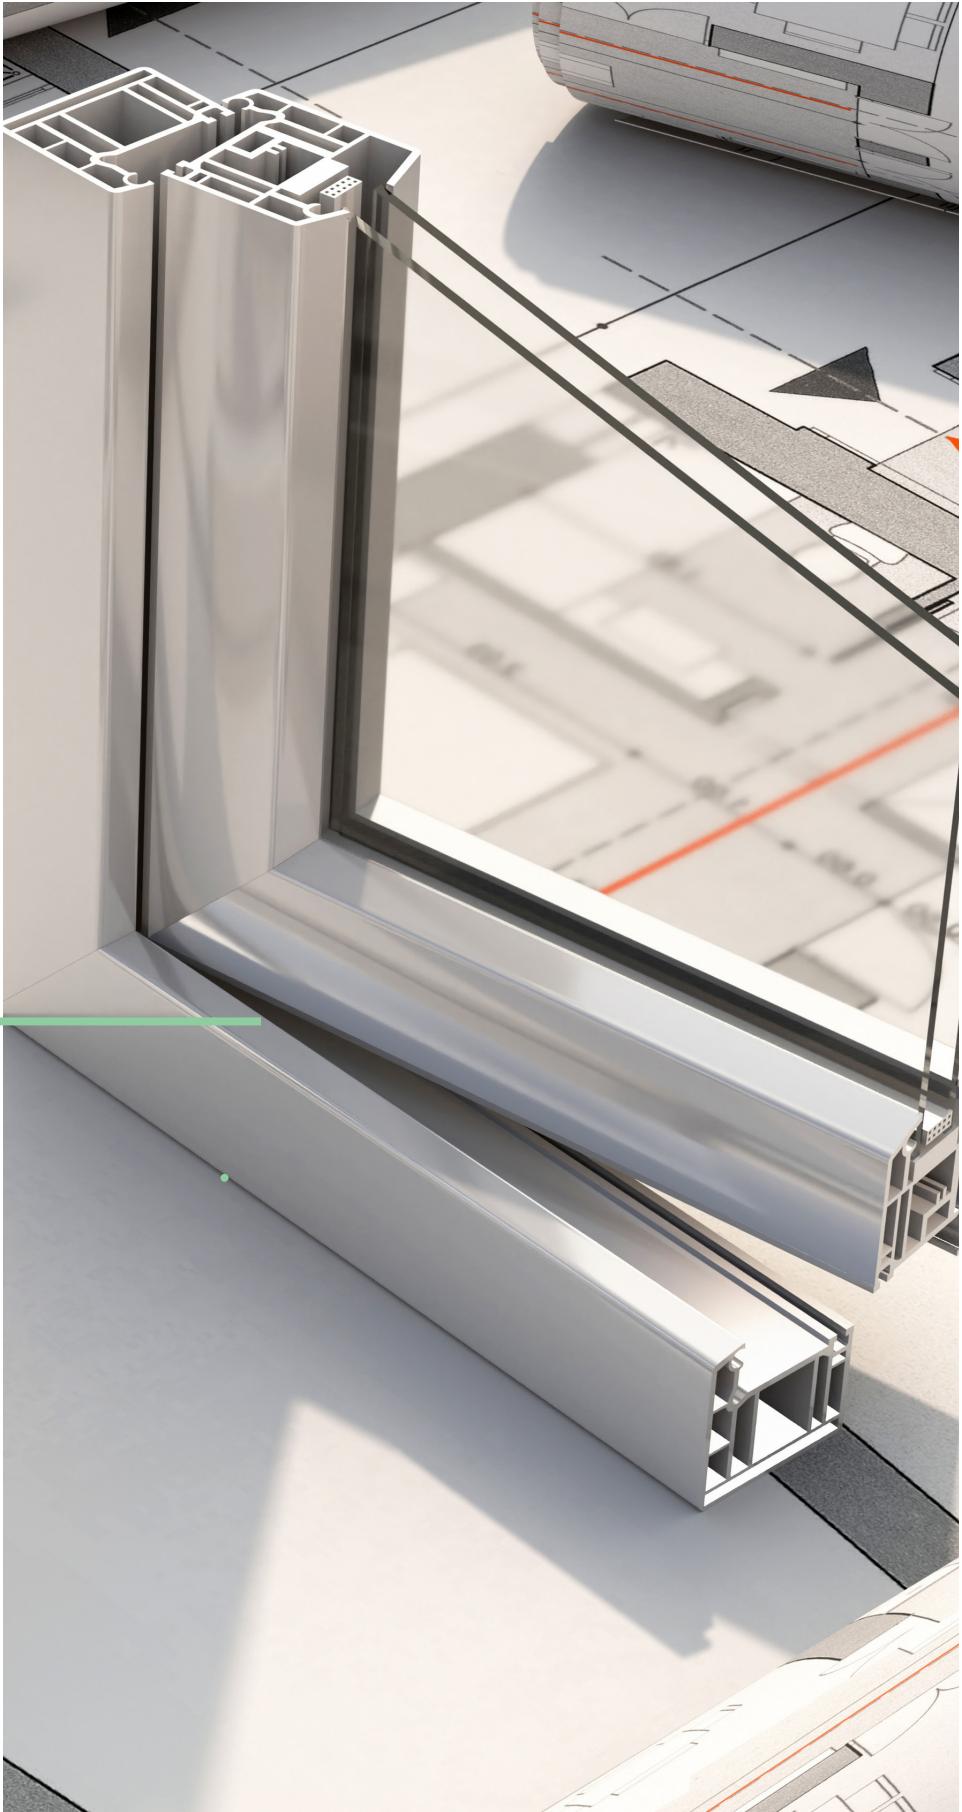

#### Advanced hardware systems

- Multi-lock points for more safety, up to 5 lock points

# PREMIER UPVC

## CASEMENT WINDOWS

The fact that around 30% of the temperature of a house is lost through the windows. The high insulation properties of PREMIER UPVC window systems with multi-chambers design keeps the heating and cooling costs low.

## PRODUCTS

PRE-C 60 | PRE-C 70

## CASEMENT PRE-C 60

European style casement window

Glass		5 - 30 mm
Chambers		3 chambers
Thickness		2 mm

### Features

#### Slimline Frame

- Designed to maximize sunlight, enhance views

#### High strength structure (Option)

- Extension of reinforcement areas in profile (reinforcement-integrated mullion and transom)
  - High water resistance
  - Water flow system inside the profile for a natural flow of water to the outside

#### High water resistance

- Water flow system inside the profile for a natural flow of water to the outside

## CASEMENT PRE-C 70

Creating luxury space with excellent performance

Glass		6 – 30 mm
Chambers		5–6 chambers
Thickness		2.5 mm

### Features

#### Outstanding heat insulation performance

- 5 to 6 chamber structure and applicable triple glass (up to 30mm) for insulation

#### Differentiated design

- Sash design for luxury style and increase water resistance

#### High strength structure (Option)

- Extension of reinforcement areas in profile (reinforcement-integrated mullion and transom)
  - High water resistance
  - Water flow system inside the profile for a natural flow of water to the outside

## DOOR PRE-C 60

### European style casement window

Glass | 5 - 30 mm

Chambers | 3 chambers

Thickness | 2 mm

## DOOR PRE-C 70

Take an exclusive and elegant living

Glass | 6 - 30 mm

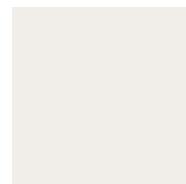

Chambers | 5-6 chambers

Thickness | 2.5 mm

## PREMIER UPVC COLOR COLLECTION

- PREMIER UPVC Profile's material has great toughness and rigidity, good chemical resistance and thermal stability, outstanding resistance to weather, and ultraviolet resistance
- PREMIER UPVC comes in a different color based on the market and customer needs for any project

## Lamination Profiles

**PREMIER UPVC Lamination is durable highly resistant to impact, abrasion and scratching. Also, very stable even when exposed to heat, humidity, or low tempera-**

- PREMIER UPVC achieved antibiosis by adding non-toxic antimicrobial.
- Highly resistant to impact, abrasion, and scratching
- Non-toxic, PREMIER UPVC lamination film free of lead, phthalate, cadmium, and mercury
